IMMUNOLOGY AND INFECTIOLOGY

## PREFACE

This brochure provides a first insight into research in Germany in the field of molecular, cellular and clinical immunology and infectiology and is especially recommended to early career researchers from abroad.

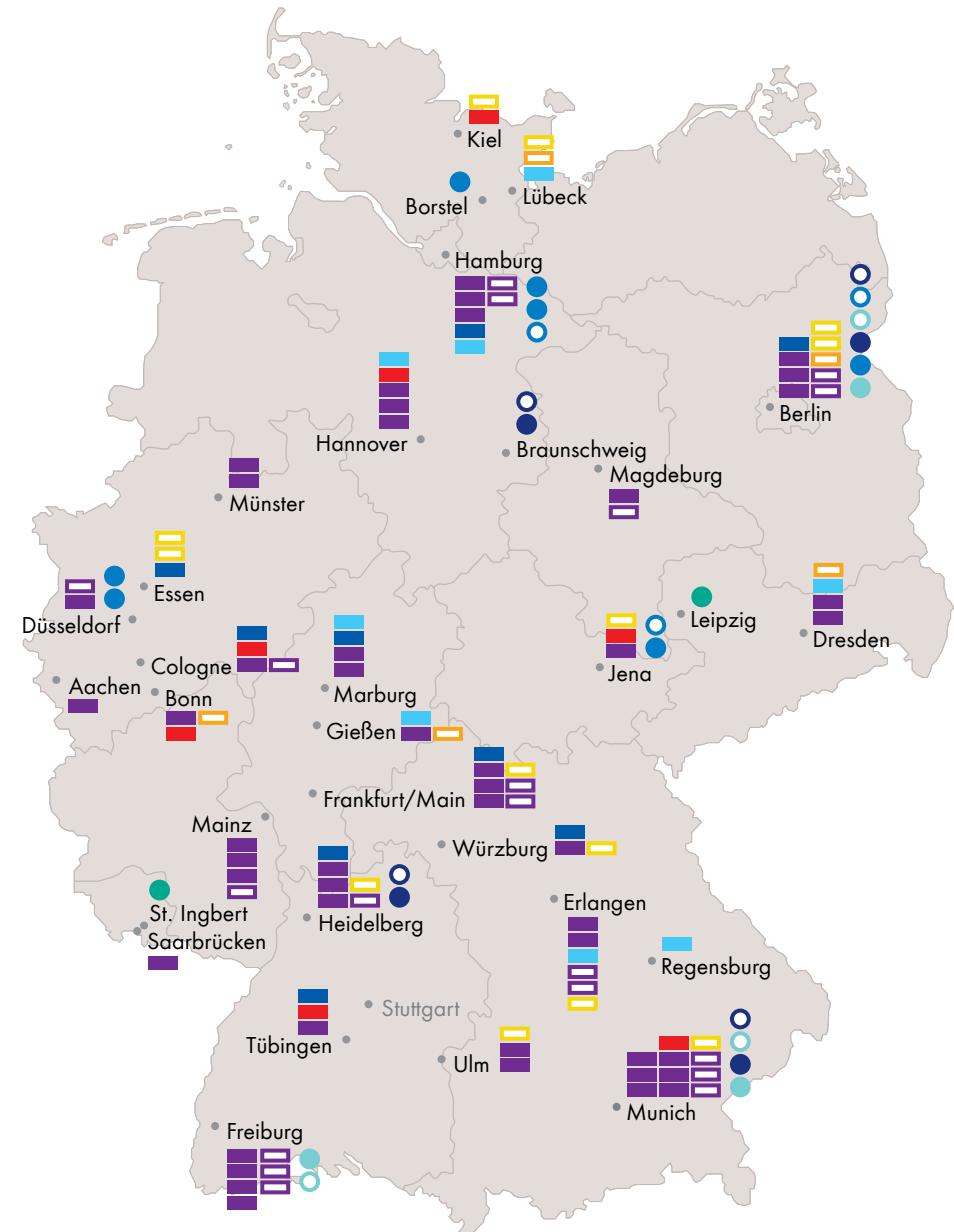

Molecular, cellular and clinical immunology and infectiology research in Germany is primarily conducted at universities but also at non-university research institutions. Almost all universities and many universities of applied sciences host a molecular, cellular and clinical immunology and infectiology research section. The spectrum ranges from small monothematic working groups to large interdisciplinary departments and covers a variety of topics from traditional areas to new explorative research fields.

This brochure is intended to give an initial overview. The following map and tables highlight research consortia and graduate training programmes at universities and non-university research institutes with a main focus on molecular, cellular and clinical immunology and infectiology.

On top of this, there is a lot more to discover: e.g. the DFG funds a multitude of individual projects in the area of molecular, cellular and clinical immunology and infectiology. These individual grants outweigh the research consortia both in number and in overall funding volume. Towards the end of this brochure, you will find a link to the online database GEPRIS that provides an overview of all DFG-funded research projects. You will also find additional important links for further information about programmes in the field of molecular, cellular and clinical immunology and infectiology and profiles of German universities and research institutions.

We invite you to explore the many opportunities that Germany has to offer and welcome your feedback.

# OVERVIEW

- Research Training Groups
- International Research Training Groups
- Integrated Research Training Groups in Collaborative Research Centres/Transregios
- Clinical Research Units
- Research Units
- Clusters of Excellence
- Collaborative Research Centres/Transregios
- Helmholtz Graduate Schools
- Leibniz Graduate Schools
- International Max Planck Research Schools
- Fraunhofer Institutes
- Helmholtz Centres
- Leibniz Institutes
- Max Planck Institutes

DFG-funded Priority Programmes and several Research Units are not shown on the map since they are not necessarily located at a single location; they are listed on pages 19 and 15.  
The map shows the headquarters of the non-university research institutions.

# CENTRES OF RESEARCH

- FUNDED BY DFG -

**Clusters of Excellence (EXC)** promote cutting-edge research. They serve to strengthen the research profiles of universities or university consortia in internationally competitive fields. They create excellent training and career opportunities for early career researchers. Within the framework of the Excellence Strategy, they can receive between €3 million and €10 million annually and are funded for seven years, starting in 2019. A second seven-year period is possible.

**Collaborative Research Centres (CRC)** are organisational units established at universities which enable researchers to pursue an outstanding research programme crossing the boundaries of disciplines, institutes, departments and faculties. The traditional Collaborative Research Centre is generally applied for by one university and is conducted by researchers of that university. Early career support is a key objective of the Collaborative Research Centre Programme. Early career researchers may get involved in a CRC in numerous ways, for example within the framework of an Integrated Research Training Group. Collaborative Research Centres are funded for a period of up to 12 years.

**Transregios (TRR)** are Collaborative Research Centres in which up to three universities collaborate with each other and submit a joint application. The contributions of the cooperative partners are essential, complementary and synergistic to the joint research objective. Funding facilitates close, nationwide collaboration among the participating universities and researchers, as well as networking and shared use of resources. There is also the option of international Transregios.

# RESEARCH UNITS

-FUNDED BY DFG-

**Research Units (FOR)** often contribute to establishing new research directions. Research Units are made up of a team of researchers working together on a research project which is often of an interdisciplinary nature. Research Units consist of several researchers and subprojects. The subprojects of a Research Unit are often located at several locations throughout Germany. Research Units are generally funded for up to six years.

In case most of a Research Unit's subprojects are located at one place, it is represented in the map.

## RESEARCH UNITS

Title	Funded Since	Contact
Receiving and Translating Signals via the gamma-delta T Cell Receptor (FOR 2799)	2018	<a href="http://www.mh-hannover.de/37755.html?&amp;l=1">www.mh-hannover.de/37755.html?&amp;l=1</a>
Tissue Type 2 Responses: Mechanisms of Induction and Regulation (FOR 2599)	2017	<a href="http://www.for2599.de">www.for2599.de</a>
Pemphigus - From Pathogenesis to Therapeutics (Pegasus) (FOR 2497) Subprojects mainly located in: Marburg ■■■	2016	<a href="http://www.uni-marburg.de/en/fb20/pegasus">www.uni-marburg.de/en/fb20/pegasus</a>

Regeneration in Aged Individuals: Using Bone Healing as a Model System to Characterize Regeneration under Compromised Conditions (FOR 2165) Subprojects mainly located in: Berlin ■■■	2014	<a href="https://jwi.charite.de/en/research/research_network_research_funding/research_network/research_unit_regeneration_in_aged/">https://jwi.charite.de/en/research/research_network_research_funding/research_network/research_unit_regeneration_in_aged/</a>
Sphingolipid Dynamics in Infection Control (FOR 2123) Subprojects mainly located in: Würzburg ■■■ and Essen ■■■	2013	<a href="http://www.virologie.uni-wuerzburg.de/forschungsverbunde/for2123">www.virologie.uni-wuerzburg.de/forschungsverbunde/for2123</a>

# CLINICAL RESEARCH UNITS

-FUNDED BY DFG-

**Clinical Research Units (KFO)** provide outstanding researchers the opportunity to carry out close, medium-term cooperation in a special research project in the field of disease or patient-oriented clinical research. Clinical Research Units are usually located at one institution. As a rule, they receive funding for up to six years.

## PRIORITY PROGRAMMES

- FUNDED BY DFG -

**Priority Programmes (SPP)** have a programmatic focus and the purpose of advancing knowledge in an emerging field of research through collaborative networked support. They are characterised by their enhanced quality of research through the use of new methods and forms of collaboration in emerging fields. As a rule, one programme can consist of up to 30 individual subprojects located at several institutions across Germany; it usually has one coordinating person. Priority Programmes normally receive funding for a period of up to six years.

Priority Programmes are not shown on the map. Only the titles of the overall themes and the project website are listed.

## PRIORITY PROGRAMMES

Title	Funded Since	Contact
Innate Lymphoid Cells (SPP 1937)	2016	<a href="http://spp-innatelymphoidcells.de">http://spp-innatelymphoidcells.de</a>
Innate Sensing and Restriction of Retroviruses (SPP 1923)	2016	<a href="http://spp1923.de">http://spp1923.de</a>
Intestinal Microbiota – A Microbial Ecosystem at the Edge between Immune Homeostasis and Inflammation (SPP 1656)	2013	<a href="http://www.intestinal-microbiota.de">www.intestinal-microbiota.de</a>
Osteoimmunology – IMMUNOBONE – A Program to Unravel the Mutual Interactions between the Immune System and Bone (SPP 1468)	2010	<a href="http://www.immunobone.de">www.immunobone.de</a>

# NON-UNIVERSITY RESEARCH INSTITUTIONS

**Fraunhofer Society** is one of the world's leading organisations for applied research with an annual research budget of 2.5 billion euros, 72 institutes and more than 26,600 employees. Fraunhofer's R&D portfolio covers a wide range of fields, including health, security, communications, transport, energy and the environment. [www.fraunhofer.de](http://www.fraunhofer.de)

**The Helmholtz Association** contributes to solving major challenges facing society, science and industry with world-level research in six areas: energy, earth and environment, health, key technologies, structure of matter and aeronautics, space and transport. With more than 40,000 employees in 18 research centres and an annual budget of approximately 4.7 billion euros, the Helmholtz Association is Germany's largest scientific organisation. [www.helmholtz.de](http://www.helmholtz.de)

**The Leibniz Association** is an umbrella organisation of 93 research institutes. The annual budget amounts to 1.93 billion euros. Some 9,800 researchers – approximately 20% of them from abroad – work on a widely diverse range of subjects, including the humanities and social sciences, economics, spatial and life sciences, mathematics, natural and engineering sciences and environmental research. [www.leibniz-association.eu](http://www.leibniz-association.eu)

**The Max Planck Society** for the Advancement of Science is one of Germany's largest independent non-profit research organisations. The Max Planck Society has been allocated approximately 1.7 billion euros for 2018. A combined total of 15,600 researchers, postdoctoral/junior researchers and visiting researchers at 84 Max Planck Institutes conduct basic research in the natural sciences, life sciences, social sciences and humanities. One third of the researchers and more than half of the junior and visiting researchers come from abroad. [www.mpg.de](http://www.mpg.de)

# GERMAN CENTRES FOR HEALTH RESEARCH

The German Centres for Health Research – launched by the German Federal Ministry of Education and Research (BMBF) in 2009 – were established as long-term, equal partnerships between non-university research institutions and universities with university hospitals. The key objectives of the federal government's health research programme is to improve efforts to fight serious diseases that are widespread in the population more effectively.

The German Centres for Health Research shall bundle existing expertise and thus make a significant contribution to closing knowledge gaps and improving the prevention, diagnosis and treatment of these diseases. The research objective is the close collaboration of basic research with clinical research – always oriented on patient needs and indications. The close ties and the associated expansion of existing research structures will enable translational research and thus a faster transfer of research findings into clinical practice.

German Centres for Health Research are not shown on the map. Only the titles of the overall themes and the project website are listed.

# GRADUATE TRAINING

- FUNDED BY DFG -

**Research Training Groups (RTG)** combine an ambitious research programme at universities with comprehensive training, tailored supervision and academic freedom to form an ideal environment for a successful doctorate. Research Training Groups can also have an interdisciplinary approach. They are funded for a period of up to nine years.

**International Research Training Groups (IRTG)** provide opportunities for joint doctoral training programmes between German universities and universities abroad. The research and study programmes are jointly developed and supervised. Doctoral students in the programme spend six months at the partner institution.

**Integrated Research Training Groups** (within Collaborative Research Centres/Transregios) offer ideal research environments for doctoral researchers. The main aim of these structured training programmes is to provide young scientists and academics with opportunities to independently carry out research at an early stage of their career. The programmes further take care to closely integrate early career researchers into an academic network. Working in Clusters of Excellence or Collaborative Research Centres projects, doctoral researchers achieve additional qualifications. As research assistants in these projects, they contribute to the Research Centre's success. They are closely involved with the projects and have access to the entire project infrastructure.

## GRADUATE TRAINING

Location	Institution	Title	Funded Since	Contact
<b>RESEARCH TRAINING GROUPS</b>				
Berlin	Freie Universität Berlin Humboldt-Universität zu Berlin	Tight Junctions and their Proteins: Molecular Features and Actions in Health and Disease (RTG 2318)	2017	<a href="https://klinphys.charite.de/grk">https://klinphys.charite.de/grk</a>
Berlin	Freie Universität Berlin	Parasite Infections: From Experimental Models to Natural Systems (RTG 2046)	2014	<a href="http://www.vetmed.fu-berlin.de/en/einrichtungen/sonstige/grk2046">www.vetmed.fu-berlin.de/en/einrichtungen/sonstige/grk2046</a>
Erlangen	Friedrich-Alexander-Universität Erlangen-Nürnberg	Key Signals of Adaptive Immune Response (RTG 1660)	2010	<a href="http://www.lymphozyten.de/DE">www.lymphozyten.de/DE</a>
Essen	Universität Duisburg-Essen	Biomedicine of the Acid Sphingomyelinase/Acid Ceramidase System (RTG 2098)	2015	<a href="http://www.uni-due.de/grk2098">www.uni-due.de/grk2098</a>
Essen	Universität Duisburg-Essen	Immune Response in Infectious Diseases – Regulation Between Innate and Adaptive Immunity (RTG 1949)	2013	<a href="http://www.uni-due.de/grk1949">www.uni-due.de/grk1949</a>
Frankfurt/Main	Goethe-Universität Frankfurt am Main	Resolution of Inflammation – Mediators, Signaling and Therapeutic Options (RTG 2336)	2017	<a href="http://gepris.dfg.de/gepris/projekt/321115009">http://gepris.dfg.de/gepris/projekt/321115009</a>
Heidelberg	Ruprecht-Karls-Universität Heidelberg	Hallmarks of Skin Cancer (RTG 2099)	2014	<a href="http://www.rtg2099.de">www.rtg2099.de</a>
Jena	Friedrich-Schiller-Universität Jena	Molecular Signatures of Adaptive Stress Responses (RTG 1715)	2011	<a href="http://www.grk1715.uni-jena.de">www.grk1715.uni-jena.de</a>
Kiel	Christian-Albrechts-Universität zu Kiel	Genes, Environment and Inflammation (RTG 1743)	2011	<a href="http://www.genesis-environment-inflammation.de">www.genesis-environment-inflammation.de</a>
Lübeck	Universität zu Lübeck	Modulation of Autoimmunity (RTG 1727)	2010	<a href="http://www.grk1727.uni-luebeck.de">www.grk1727.uni-luebeck.de</a>
Munich	Ludwig-Maximilians-Universität München	Targets in Toxicology – Deciphering Therapeutic Targets in Lung Toxicology (RTG 2338)	2017	tba
Ulm	Universität Ulm	Cellular and Molecular Mechanisms in Aging (CEMMA) (RTG 1789)	2012	<a href="http://www.uni-ulm.de/med/cemma">www.uni-ulm.de/med/cemma</a>

# GRADUATE TRAINING

## -AT NON-UNIVERSITY RESEARCH INSTITUTIONS-

**Helmholtz Graduate Schools** provide a roof under which a varied number of curricula in different fields, or across disciplines, can find a home. Helmholtz Graduate Schools constitute a valuable addition to the wide range of training programmes available within the Helmholtz Association. They offer optimal conditions for PhD students to work and enable them to create a network of contacts with fellow university researchers while also fostering the integration of participants into the research environment.

**Leibniz Graduate Schools** were established to foster the systematic promotion of junior researchers. Young researchers are given the opportunity to do their doctorates in an excellent, collaborative, cross-disciplinary research environment. To this end, Leibniz institutions cooperate closely with universities. As every Leibniz institution focuses on clearly defined, socially-relevant themes, doctoral candidates have a wealth of networking opportunities in a large, dedicated scientific community. The particular character of research at the institutions in the Leibniz Association, which includes fundamental, large-scale and application-oriented research, means doctoral candidates can conduct research from basic idea right through to application.

**International Max Planck Research Schools (IMPRS)** offer talented German and international junior scientists the opportunity to earn a doctorate under excellent research conditions. The research schools are established by one or several Max Planck Institutes. These IMPRS work in close cooperation with universities and other – sometimes international – research institutions. This provides an extraordinary framework for the graduate students to work in, and is a great advantage in interdisciplinary research projects, or in projects that require special equipment.
